### Personal portfolio

Tech stack: Github, vyz, Django

Developed a dynamic personal portfolio using **Python** (Django) to showcase my background, projects, and backend development skills. Integrated project listings from GitHub and added a contact form to make it easy for visitors to reach out.

### Inventory management app

Tech stack: Github, django

Developed a backend-focused inventory management system using Django to track products, quantities, and categories. Built features for adding, updating, and deleting items, with stock alerts and admin authentication for secure access.
